REDEFINING POLLUTION

-something that nobody has figured out a use for yet

ECO - PAINTING

Upper primary and lower secondary Biosphere students explored a novel approach to tackling pollution by repurposing waste materials into painting tools, such as expired lotion and used toothbrushes. Typically discarded, these items often find their way into landfills, contributing to environmental degradation. Encouraged by this concept, the students embarked on additional innovative projects. As R. Buckminster Fuller said, "Pollution is nothing but the resources we are not harvesting. We allow them to disperse because we've been ignorant of their value."

PRECIOUS PLASTIC FUN FAIR

~ making collection of plastic waste fun!

Objectives of this fun fair:

- to redefine pollution by turning waste into new products.
- to convert boring things into something fun!
- to boost creativity of the students through game creation and game building
- to reduce waste by using pre-loved items as rewards of winning the games.
- to learn about types of plastic and what we can do with them by collaborating with social enterprises.

Knowing where the plastic waste will go ~

The plastic waste will be turned into new products such as plant pots, keychains, necklaces, coasters in collaboration with Upcycled by Fuze Ecoteer.
